

Ant Baiting Preparation Checklist

Kitchen:

- Remove all food sources
 - Remove any fallen food behind, below and on top of the the fridge and stove
 - Store all food in sealed containers
 - Remove any food from countertops and floors
- Clear all items under the Kitchen sink
- Clear all countertops
- Remove any beverage cans

Bathrooms:

- Clear under bathroom sink
- Clear bathroom countertops

All other Living Space:

- Make note for your technician of any locations you have found Ants

Precautions

- Avoid contact with any treated areas
- Do not touch gel baits without gloves

Post Treatment Instructions

- Do not move or tamper with monitors left by your technician.
- A follow up treatment will be booked 2 weeks out.
- Maintain excellent sanitization in the kitchen - This is imperative for the ant baits to be effective.
- Remove household garbage daily
- Do not use any insect sprays, dusts or baits yourself. This will interfere with our process.
